The following "Superior" offering was selected from among the 50 most popular varieties chosen by the American Gladiolus Society, a compilation of favorites for 4 years, and our list includes 24 of the varieties selected. The figures in parentheses designate the rating. The corms quoted below are larger than ordinary "blooming size" stock. They are top size, 1½ inch and up, and will throw larger spikes than any smaller sized corms possibly could. We anticipate a brisk demand for "Superior" Glads this spring and want to supply "top size" stock, so please order early.
